

0693 Cove Base Adhesive Acrylic VOC FAQ

What is the base chemistry for this formula? Proprietary aqueous emulsion blend.

Is this a VOC Compliant product? Yes; the 0693 Series is suitable for sale in California, OTC & other regulated areas.

Are there any Prop 65 Ingredients in the 0693 Series formula? Yes (see MSDS).

Is this a flammable formulation? No; product exhibits a flash point of > 200F.

What is the color of this product as supplied? Off-white to Lt. Beige

Can 0693 Series be considered “environmentally safe”? Yes; @ < 1.0%/weight VOC & solvent-free, the formula is very much “environmentally safe”.

What are some substrates on which 0693 was designed for use? Bonding rubber cove base to painted or unpainted gypsum wall panels, plaster, paneling, concrete & other common building substrates.

Is 0693 Series Freeze-Thaw Stable? Yes – stable for a minimum of 5 F/T Cycles @ 0 degrees F & 72 degrees F.

What is the consistency of the 0693 Series? Viscous Paste.

Is there an odor present during application & cure? Yes, but very mild & odor disappears with cure.

What is the standard packaging for this product? Cartridges.

What coverage should I expect from each cartridge size? Approximately 32 linear feet of ¼ inch bead with the 10.0 oz cartridge & approximately 89 linear feet of ¼ inch bead with the 28 oz cartridge.

What is the approximate Working Time for the 0693 Series? 20 minutes in normal climatic conditions.

Should I apply adhesive to both surfaces to be bonded? No. Adhesive should be applied one of the surfaces in either a continuous or spot bead. Enough adhesive should be applied for 90% coverage once Cove Base is put into place. For best results use a hand roller to press adhesive into place.

What is the clean up solvent for the 0693 Series? *Water before cure; Mineral Spirits after cure (follow instructions/note cautions/warnings on Mineral Spirits label)*

What are the ideal storage & application temperature ranges for the 0693 Series? *40F to 90F (low-end should be 40F & rising).*

Where can additional information be found on the 0693 Series? *See MSDS & TDS on this website (www.reddevil.com).*
