

0899 Series Solvent-Free Drywall Construction Adhesive FAQ

What is the base chemistry for this formula? Proprietary aqueous emulsion blend.

Is this a VOC Compliant product? Yes; the 0899 Series is suitable for sale in California, OTC & other regulated areas.

Are there any Prop 65 Ingredients in the 0899 Series formula? Yes (see MSDS).

Is this a flammable formulation? No; product exhibits a flash point of > 200F.

What is the color of this product as supplied? Off-white to Lt. Beige

Is 0899 Series a spec-compliant formulation? Yes. Product meets the requirements of ASTM C557.

Can 0899 Series be considered “environmentally safe”? Yes; @ < 1.0%/weight VOC & solvent-free, the formula is very much “environmentally safe”.

What are some substrates on which 0899 was designed for use? Designed for bonding gypsum drywall and paneling to wood and metal studs.

Is 0899 Series Freeze-Thaw Stable? Yes – stable for a minimum of 5 F/T Cycles @ 0 degrees F & 72 degrees F.

What is the consistency of the 0899 Series? Viscous paste.

Is there an odor present during application & cure? Yes, but very mild & odor disappears with cure.

What is the standard packaging for this product? Cartridges.

What coverage should I expect from each cartridge size? Approximately 32 linear feet of ¼ inch bead with the 10 oz cartridge & approximately 89 linear feet of ¼ inch bead with the 28 oz cartridge.

What is the approximate Working Time for the 0899 Series? 30 minutes in normal climatic conditions.

Should I apply adhesive to both surfaces to be bonded? No. Adhesive should be applied to one of the surfaces in either a continuous or spot bead. Press surfaces together firmly with a slight twisting motion.

What is the clean up solvent for the 0899 Series? Water before cure; Mineral Spirits after cure (follow instructions/note cautions/warnings on Mineral Spirits label)

What are the ideal storage & application temperature ranges for the 0899 Series? 40F to 90F (low-end should be 40F & rising).

Where can additional information be found on the 0899 Series? See MSDS & TDS on this website (www.reddevil.com).
