

Technical Data Sheet

Paint Texturizer Product No. 0240

Description

Paint Texturizer is an easy to use variable particle-sized mineral aggregate intended for mixing with various paints to produce a surface textured effect.

Key Features

- Excellent shelf-life when stored as directed
- Works well with most paint types
- Perlite imparts no color to paints & except for colors in light refraction, does not change paint color.

Uses

- Add Paint Texturizer to any paint for a decorative, textured finish.
- Hides cracks and scratches in walls and ceilings.
- Paint and texture in one easy application.

Surface Preparation

Surface should be clean, dry and primed if necessary. Repair large holes or cracks with a lightweight spackling compound such as Red Devil Paint Master Lightweight Spackling or Red Devil Onetime Spackling.

Directions

1. Following label directions, gradually add entire contents of bag to one gallon of paint.
2. Stir continuously to avoid clumping. For best results, stir paint occasionally when using.
3. Depending on desired finish more or less aggregate can be added to the paint. Test small area to determine amount.
4. Using a one 1/2" nap paint roller, dip roller into mixture and apply to surface. For best results, spread in a crisscross pattern.
