

Red Devil

NON-COMBUSTABLE SMOKEBLOCK™ SEALANT

SMOKEBLOCK™ is a non-combustable sealant that is used to fill the annular space around penetrants and along seams to openings throughout the entire building. When installed properly, it will provide fireblocking as well as smoke and draft stopping in wood frame walls and floors. It conforms to the Model Energy Code by minimizing air flow within the wall cavity without contributing to the fuel load of the wall itself.

Features:

- Quality non-sag sealant
- Meets Fed. Spec. ASTM E136
- Light red for easy identification
- Consistent quality - no shaking or mixing required
- Water-based for easy installation, clean-up and disposal

Use On:

- One or two family dwellings
- Buildings that do not exceed 3 stories
- Wood Frame walls and floors
- Around vents, pipes, chimneys and fireplaces
- Around general building seams to openings
